RE: Letter of Recommendation for Greene Companies, Inc.

To Whom It May Concern:

It is with great pleasure that I am writing this letter to recommend a company that I have worked with for my near nine years with SCI. For over a decade, Greene's has been a household name for all of our flat saw and core drilling needs.

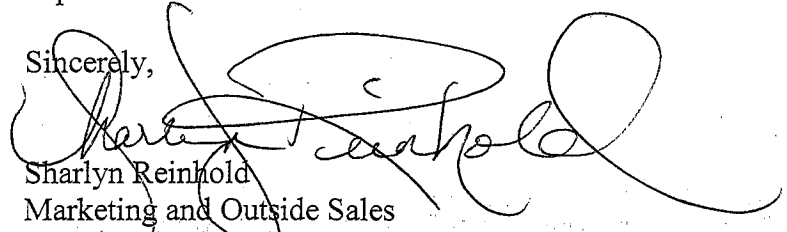

With the contract restrictions that SCI is held to by our customers, Greene's has proven time and again to generously adjust their normal in-house routine to insure that we have all the information necessary to bill. This may not sound like much, but in today's world it is extremely difficult to change a regular procedure to assist one single customer. Not only have we asked this from them before, current contract obligations require us to ask for change often – and each time, they comply.

In the nature of the telecommunication business, we have learned that “pre-planning” is a seldom achievable task. Emergency work is simply described as routine. Items that can be pre-planned usually change a few times before the service is performed. I have always been impressed with their flexibility when an ASAP job is requested. Realizing the burden this places on dispatching, it is comforting to know that they will do all they can to “just make it happen”.

Over the past few years, we have had the opportunity to work with the concrete placement division, as more and more projects focus on the removal and replacement of large panel sections of roadways. As this is a specialized market, it is reassuring to know that the same experience and expertise displayed with their sawcutting has bled over to the concrete placement division.

I am genuinely thankful for subcontractors like Greene's, and look forward to many years of service. I would strongly recommend them to any inquirer, and would be honored to discuss my experience in further detail if the need arises.

Sincerely,

Sharlyn Reinhold
